MedStar Health / InPlace NETWORK

MedStar Allied Health InPlace Sites

InPlace is a clinical placements request and onboarding software currently being used by the MedStar Health Department of Nursing. Many of our nursing coordinators also process non-nursing disciplines. As such, **some** MedStar Health entities will be using InPlace for requests/onboarding of non-nursing disciplines. Please see below for MedStar Health sites using InPlace for requests and onboarding by student type. Hospitals/disciplines not listed will continue their usual process.

To register for an InPlace account: Please fill out this registration form

Please see the training video here: https://vimeo.com/877646940/6e14bac553?share=copy

Student group not listed? Please reach out to academicpartnerships@medstar.net

PLEASE NOTE: Other sites may still accept students but are not currently using InPlace. Please connect with the MedStar entity coordinator you usually work with to determine if placement requests are being accepted through InPlace or other method.

* Currently MedStar Montgomery Medical Center (MMMC) and MedStar St. Mary's Hospital (MSMH) are using InPlace for all students that can be placed at their facilities.
